## 3D SMART LINE PROFILE SENSORS

**BLUE  
LASER**

Phone component & frame inspection

Battery weld inspection

Glue bead inspection

Gocator 2500 3D smart sensors are the fastest, most compact, and advanced Gocator laser line profilers to date. Designed for high performance small parts inspection, these line profilers achieve inspection rates up to 10 kHz (including scan, measure, and control) and high X resolutions down to 8 microns. A custom 2MP high speed imager, optimized optical design, and blue laser light generate excellent data with highly repeatable results on shiny and other challenging surfaces.

- Pre-calibrated to scan out-of-the-box
- X resolution down to 8µm
- 10,000 profiles per second including 3D measurement
- Setup & control via web browser or SDK
- Built-in tools, no programming
- Extend with GDK and GoMax

### INSPECT WITH SPEED AND PRECISION

See and do more with micron resolution and faster scan rates. Take advantage of the higher speed by enabling multiple exposures to measure high-contrast targets at production speed. With an X resolution down to 8 µm, small features such as edges or gaps can be easily measured.

### LARGE FIELD OF VIEW AND MEASUREMENT RANGE

Accomplish more with fewer sensors, while still capturing the finest surface and edge details with a large field of view. A large measurement range lets you handle a wider variety of parts.
