AMBER 2.8/40 V38

This vibration-resistant lens is designed for use with large-area and line-scan sensors in harsh conditions, as encountered in many industrial applications. Its highly homogeneous imaging performance across the entire image field, combined with low chromatic aberrations and geometric distortions, ensures very high image quality across a wide magnification range. The V38 mount is compatible with the modular V38 system and its wide range of accessories, including focusing mounts, extension tubes and camera adapters.

Key features

- Uniform MTF from center to edge
- Low distortion
- Low chromatic aberrations
- Large image circle

Applications

- Machine Vision
- AOI (Automated Optical Inspection)
- FPD/PCB inspection
- Logistics
